I was aware of this fact before my departure from England, and in reply to a com-munication which I addressed to the Secretary of State upon the subject, I received a despatch, dated the 16th September, 1863 which I have now the honor to submit for the information of the House of Assembly. In submitting this subject to the House, would observe, that it is one wholly distinct from that of the Civil List, and it will be for the consideration of the House whether it

should not be so treated. In the event of the House of Assembly being disposed to entertain the question of a temporary residence for the Governor of the Colony, or the erection of a permanent one

or both, I will be prepared to submit a definite proposal on either or both subjects.

We do not think that any more remains to be said on this head. It is reasonable to suppose that the remainder of the document is of an equally incorrect character. The whole message bears an exceedingly suspicious aspect, and when we have shown that it is historically untrue upon the only two local points with which it condescends to deal, may we not, with propriety, cast a doubt upon the correctness of every statement that it contains? The magnanimity-the spirit Governor gives us to understand he displayed when "it was at his intercession alone that the order to sell the withheld"-is certainly worthy of admiration. Coming from any other source but the Governor, it would not surprise us to hear that the Imperial that costly pile-indeed, after the manner in which we were traduced in the Paris letter, and the low estimate that was sought to be placed upon the Islanders, we are only surprised that the Home Government was not ready to sell the Island, people and all, to the highest bidder, as a piece of property not worth the keeping, and which, like the beggar of Bagdad's shoes, it would

THE FENIAN FIRE, as we find by the London Review, is a solution of phosphorus in bisulphide of carbon. The properties of phosphorous are well known, but those of bisulphide of carbon, a comparatively recently introduced chemical preparation, are not generally understood. Bisulphide of carbon is a highly inflammable liquid, colorless and almost transparent, giving off during combustion fumes of sulphurous acid. It volatilizes very rapidly at ordinary temperatures, and when its vapor is mixed with air, and a light applied, it inflames with such rapidity as to cause a slight explosion. Its vapor is poisonous. Phosphorous dissolves easily in bisulphide of carbon if the temperature of the latter be slightly raised. The compound wood, or other combustible material, it ignites them instantaneously.

A SINGULAR DISCOVERY-THE BONES OF AM INDIAN WARRIOR FOUND IN A FLOATING Log.—It is a matter of doubt, whether Ma-cauley's New Zealander will muse over the caulty's New Zealander will muse over the ruins of London, but so rapidly has change followed change in the history of this Western country, that the philosopher of to-day may ponder over the disappearance, we may say extinction of a savage race that once occupied this land, and but a few score years ago, camped on the ground now cove-ed by the houses of a teeming city. It would be almost impossible for the students of western annals to realize the strange changes western annals to realize the strange changes that have followed each other so fast, were it not that occasionally history is authenticated by the discovery of traces of evidences of a race and customs that here vanished forever. A discovery of this character was dovelcped yesterday, which is not without

interest and historic value.

The facts respecting the matter are reported to be as follows: Two men engaged in hauling out drift wood on the Illinois shore, nearly opposite the arsenal. Som distance from the bank of the river, they ob distance from the bank of the river, they observed a large trunk of a tree, which, as it appeared sound, they determined to gain possession of it if possible, and, after some difficulty, succeeded in bringing it to shore. On examining the large log they noticed one end was partly split open, and it appeared as if it had been stuffed with moss or leaves, or come substance of that chargeder. The company of the control of the some substance of that character. The cu riosity of the men was excited, and they went to work, and by inserting wedges in the crack, succeeded in splitting the log open, when they found it was hollow on the inside, and that the cavity was filled up with what appeared at first sight, to be the full form of a man wrapped in a buffalor one which although bearing indigations of robe, which, although bearing indications of great age was still unbroken, and discovered inside the skeleton of a man, the flesh entirely wasted away, but the bones still ad-hering tegether, and preserving the form and outline complete. Beside the bones of this Indian brave were found, it is said, a tomabawk, a quiver full of arrows, and a bow, all exhibiting marks of great age, and doubtles having been preserved from decay by the exclusion of the air. We are not exactly informed as to what course the men pursued on making this singular discovery It is to be hoped and presumed they buried decently the remains of this defunct Indian warrier, and carefully collected the various article found, as they are full of interest to the anti-quary and savant.—St. Louis Republican.

NEW SPRING GOODS .- AT VICTORIA HOUSE-(corner of Fort and Douglas streets,) are now being unpacked the first instalment of their spring goods received by last steamer, comprising novelties in dress materials for spring and summer wear, Ladies' and Children's Mantles and Jackets, Hats, Bonnets, &c., &c.

MR DALLY takes pleasure in announcing to the inhabitants of Victoria and its vicinity that the alterations in his photographic gallery are now completed, and that those who favor him with a visit may depend upon getting a faithful portrait. Views of houses or scenery photographed in an artistic manner, Fort street, near Government.

Honrary is the best policy in medicine as well as in other things. Aver's Sarsapa-Rilla is a genuine preparation of that un-equalled spring medicine and blood purified, decidedly superior to the poor imitations heretofore in the market. Trial proves it. \*

New and Grand Epoch in Medicine. A New and Grand Epoch in Medicine—
Dr. Maog the is the founder of a new Medical System
The quan itarians, whose vast internal doses enfecthe the
someth and paralyze the bowels, must give precedence
to the man who restores health and appetite, with from
one to two 'the extraordinary lifes, and cares the most
virulent sores with a box or so his wonderful and all
healing Salve. These two great specifies of the Doctor
are fast superseding all the stereotyped nostrum of
day. Extraordinary cures by Maggel's Pills and Salve
have coned the eyes of the public to the inefficiency of
the (so-called) remedies of others, and upon which people have so long blindly depended. Maggiel's Pills are
not of the class that are swallowed by the dozen, and of
which every box full taken creates a absolute necessity
for another. One or two of Maggiel's Pills suffices to
place the bowels in perfect order, tone the stomach, cre
at on a peptite, and render the spirits light and boyant.
There is nogriping, and no reaction in the form of const,
pation. If the liver is affected, its functions are restored
and if the norvous system is feeble, it is invigorated,
This last quality makes the medicines very desirable for
the wants of delicate females. Ulcerous and cruptive
divenses are literally extinguished by the disenfectant
power of Maggiel's Salve. In fact, it is here announced
that Maggiel's Ballious, Dyspeptic and Diarrhea
Pills cure where all others tail. While for Burns
Scaids, Onlibans, Cats, and all braisons of the skin
Maggiel's Salve is intainable. Sold by J. Maggiel's
I line street, New York, and all Druggists, at 25 cents p

Another Medical Triumph.—Wonderful cure of rbeumatism. No disease is more agonizing than blemmatism; none more difficult to relieve; yet a case which, for thirty years, had baffied the faculty has, it appears, been completely cured. The particulars are given, with expressions of astonishment at the result, in many of the western journals. They state that John Koche, of Cleveland, Onio, aged aftly six years, had, for the greater part sortiption. His limbs had been racked, and contorted by pain and muscular codtractions, until his knee-jounts were of the size of a man's bead, and his fingers knotted and drawa up, until they resembled the claws of a bird of prey more than human hands, while a secondious tendency in the blood was indicated by blotches and quatures on various parts of his body. In this dire con dition he began to use Bristol's Singar-conted Pills, in conjunction with that great antitote to the virus of scrotola, Bristol's Sarranpayilla. Eleven vials of the Pills, and eight bottles of the sarsaparilla, releved him from every vestige of pain; and, aithough his limbs and joints have been only partially relaxed (for they were beyond absolute cure), he is now well, cheerful and able to attend to his busness. The Pills are put up in glass vials, and will keep in any climate. Both medicines are obtainable of all druggists. Another Medical Triumph.—Wonderful cure

Libels on the Flowers.—The incense breathing blossoms of every clime are intamously libelled by parties who attach the names of these exquisite products of nature to preparations manufactured from pungent essential oils, Murray and Lanman's Florida Water, for thirty years the standard perfame of Bpanish America, is frequently simulated by impostors, whose preparations are not only wirthless, but deletrious to health, producing a permicuous effect upon the brain and nerves, besides becoming rancid and disagree-able to the sonse of smell soon after contact with the air. Beware of such. Avoid them Murray and Lamman's Florida Water is the purest and most lasting of all perfunce. Agin Puchasors are requested to see that the words "Flostan Water, Murray and Lamman's No 50 Water street, New York," are stamped in the glass on each bottle. Without this none is genuine, 531

Inflammatory Eruptions.—Few diseases of the skin that are not marked by constitutional symptoms, are so dangerous at Fryspleak. Its seat is in the derma or true skin, and during its continuance the superficial vessels are surcharged with an indecious virus. Yet it yields with a readness aimost incredible to the depurative counter-ciritating properties of Bristol's Sarsn-parilla, All the external cruptions, such as sait the unit. Ayer's Sarsaparilla,

A compound remedy, in which we have labored to produce the most effectual alterative that can be made. It is a concentrated extract of Para Sarsaparilla, so combined with other substances of still greater alterative power as to afford an effective antidote for the diseases Sarsaparilla is reputed to cure. It is believed that such a remedy is wanted by those who suffer from Strumous complaints, and that one which will necomplish their cure must prove of immense service to this large class of our afflicted fellow-

mous complaints, and that one which will accomplish their cure must prove of immense service to this large class of our afflicted fellow-citizens. How completely this compound will do it has been proven by experiment on many of the worst class to be found of the following complaints.

complaints:

SCROPULA AND SCROPULOUS COMPLAINTS,
ERCPTIONS AND ERUPTIVE DISEASES, ULCERS, PIMPLES, BLOTCHES, TUMORS, SALT
RIERM, SCALD HEAD, SYPHILIS AND SYPHILITIC AFFECTIONS, MERCURIAL DISEASE,
DROFST, NETRALGIA OR TIC DOULOUREAUX,
DEBILITY, "DYSPEPSIA" AND INDICESTION,
ENYSPELAS, ROSE, OR ST. ANTHONY'S FIRE,
and indeed the whole class of complaints grising
from IMPURITY OF THE BLOOD. "I"

This compound will be found a great pro-

and indeed the whole class of complaining grising from IMPURITY OF THE BLOOD. (\*10%)

—This compound will be found a great promoter of health, when taken in the spring, to expel the foul humors which fester in the blood at that season of the year. By the timely expulsion of them many rankling disorders are nipped in the bud. Multitudes can, by the aid of this remedy, sparothemselves from the endurance of foul eruptions and ulcerous sores, through which the system will strive to rid itself of corruptions, if not assisted to do this through the natural channels of the body by an alterative medicine. Cleanse out the vitiated blood whenever you find it is mpurities bursting through the skin in pimples, cruptions, or sores; cleanse it when you find it is obstructed and sluggish in the veins; cleanse it whenever it is foul, and your feelings will tell you when. Even where, no particularly disorder is felt, people cripty better; health, and live longer, for cleansing the blood. Keep the blood healthy, and all is well; but with this pabulum of elife disordered, there can be no nasting health. Sooner or later something must go wrong, and the great machinery of life is disordered or overthrown.

Sarsaparilla has, and deserves much, the reput-

must go wrong, and the great machinery of the is disordered or overthrown.

Sarsaparilla has, and deserves much, the reputation of accomplishing these ends. But the world has been egregiously deceived by preparations of it, partly because the drug alone has not all the virtue that is claimed for it, but more be-

tions of it, partly because the drug alone has not all the virtue that is claimed for it, but more because many preparations, pretending to be concentrated extracts of it, contain but little of the virtue of Sarsaparilla, or any thing else.

During late years the public have been misled by large bottles, pretending to give a quart of Extract of Sarsaparilla for one dollar. Most of these have been frauds upon the sick; for they not only contain little, if any, Sarsaparilla, but often no curative properties whatever. Hence, bitter and painful disappointment has followed the use of the various extracts of Sarsaparilla which flood the market, until the manup itself is justly despised, and has become synonymous with imposition and cleat. Still we call this compound Sarsaparilla, and intend to supply such a remedy as shall rescue the name from the load of obloquy we have rests upon it. And we think we have ground for believing it has virtues which are irresistible by the ordinary run of the diseases it is intended to cure. In order to secure their complete eradication from the system, the remedy should be judiciously taken according to directions on the bottle.
